CATALOG

WWW.BORATOOL.COM

BORA was founded in 2006, spurred on by the idea of creating a clamping straight edge that would allow effortless straight cuts on sheet goods. Our goal was simple - - make a tool that made the job easier and faster without compromising the results. And so, we did. The Clamp Edge was made and BORA was born.

Over the years as our product lines have grown, our mantra has remained the same: create innovative tools that simplify tasks and deliver professional results. And by doing so, enable our users to increase productivity and expand not only their capabilities, but their workspaces as well. Because at BORA, we know that unless our tools are helping people complete projects faster and safer with better end results, we're not doing our job.

From our Work Stands, Saw Horses, and Mobile Bases that offer the very best option for workspace mobility and flexibility, to our Saw Guides and Shop Accessories that provide efficiency and functionality for a wide variety of projects, BORA's tools have been designed to endure the long days on the jobsite, at the workshop, or in your garage.

So, whether you're a professional, DIY enthusiast, craftsman, or hobbyist we have the tools you need to get the job done.

NEW!

NGX Saw Plate RT **NGX** **WTX**
546001

Tool-free mounting that is adjustable to fit most all circular saws

Router Guide **NGX** **WTX**
542005

Get straight, accurate dados, rabbets, and mortises every time.

Jig Saw Guide **NGX** **WTX**
542009

Easiest way to maintain control of your jig saw.

NEW!

Rip Guide
546400

The all-new BORA® NGX RIP Guide makes it quick and easy to accurately rip sheet goods down to size. Whether you need to make one, or multiple cuts, the durable aluminum twin rail design prevents racking and misalignment, while the oversized ergonomic handle provides ultimate control.

BORA
MEET
THE
MAKER

SARAH LISTI

Tool Girl's Garage

Meet the Maker is our series highlighting amazing professionals, woodworkers and DIYers! These are people who inspire and impress us daily with their creativity, dedication to their craft, and hard working nature.

We're catching up with Tool Girl's Garage — known in the real world as Sara Listi. Check out this quick snapshot of her life as a woodworker.

How did you get into woodworking?

I was so lucky to be raised around construction in general, not a lot of people have that experience and I know it inspired me a lot. Woodworking happened to be the discipline I enjoyed the most, so it was easy to focus in on it. Once I got a bit older it really transformed from a hobby to something I could truly make a living from.

What is one of the most valuable lessons you've learned during your woodworking journey?

Just do. Sometimes we make mistakes and it's easy to get caught up in that, but you just can't. Mistakes are how we learn – once you really accept that and treat those “whoops” moments as opportunities you can really grow. Your journey is going to be different than everyone else's, so you have to prepare for that too.

What did you do before going woodworking full-time?

I had a variety of jobs in my life! From a full-time student to a property manager, customer service and sales. My most important role is mom though! I think I took a little of all of those things into my business too.

What does woodworking mean to you? How does it add value to your life personally?

I really went headfirst into woodworking after I had kids. I think for me the combination of the structural components with the sensory experiences really made it something I enjoyed and found comfort in. I often say woodworking is as much therapy as it is a business.

What are your favorite BORA tools and why?

This is a tough one! I absolutely love my centipede, it's sort of the unsung hero in my shop because it's used on virtually every project, and I often use them out of the shop too! I love the NGX cutting systems as well, anytime you can make straight cuts, especially with a variety of tools is a win!

What is the best advice you can give to someone who would like to begin woodworking?

Just start. There just isn't a better way to go about it than to just go. Sometimes those first steps are super stressful, but they shouldn't be, keep it fun, leave room for mistakes, and enjoy the process!

Tell us more about your insights as a woman in the woodworking industry. How can other women interested in woodworking break through any barriers and feel confident in their skills and knowledge?

I was really lucky to have a Dad who really never let the fact that I was a girl dissuade him from including me. I don't think I ever really considered my skills all that different until I started sharing it online. Once that happens, things come into focus a bit. Anytime you're in an industry that you're a minority, it really is vital to grow a thick skin. No matter what, you're going to have people who like your work and people who don't. Oftentimes, the negativity has very little to do with you and much more to do with their own insecurities. I often hear about young girls who follow me or parents share that they love the example that I set for their young girls and women in the trades in general, that's wildly humbling. If anything, knowing that brings me much more awareness to what I share and how I handle mistakes too.

A lot of people use you as inspiration for projects, where do you get the inspiration for your next project?

I really try and look at what problems in a space need to be solved and create a design from that. I am a functional designer in that way, whether furniture or a renovation project, I try and really consider how to suit a need, then make it attractive second.

Outside of woodworking what are other hobbies you enjoy?

I really enjoy spending time with my family, gardening, playing with our two dogs- Miter and Chip, and I love to get lost in a good book!

What is the most used tool in your collection/ workshop?

I honestly would have to say I use my table saw or router the most, and of course the accessories that go along with those tools too!

You've had experience in television and entertainment. What have been some of your favorite highlights on that side of the journey?

The great thing about working on TV projects is definitely the amazing people you meet along the way. Both the people I worked with on the show and the families we got to work with were just amazing. It was such a humbling experience to be involved in such a huge part of their lives, especially given the history of the homes we worked on!

What is your approach when you try a new skill or technique and find it more difficult than you originally thought it would be?

Most everything in life is harder than you “think” it'll be. I just always go into a new process leaving room for error and allot extra time to correct mistakes or do a process more than once. It sounds simple, but I struggled a lot early on in really practicing that. There's nothing worse than struggling to get something right and being on a deadline. That really compounds the problem for sure!

What is your all-time favorite project you have completed?

This is always so hard to answer! The long and short of it is, almost every project holds a special place in my heart. A few that stand out woodworking-wise is definitely the massive 9-foot dresser I built, it's navy with gold hardware, walnut wood, and brass dowels, it was a total stunner to put together! Another is the pecan coffee table and bench. They're very modern and streamlined, and pecan is a wood that is so often underutilized!

Portacube STR Miter Saw Workstation
PM-8000

Functions as miter saw stand and workstation. Rotate the table top 360° to use your miter saw and flip it back to put it away.

Expands to provide up to 7 ft. (2.1m) of working space

Convenient handle for easy transport

Fits any miter saw up to 26.5" wide

360°

Great for small work spaces

10-inch (25.4 cm) easy-roll wheels

**Portable Folding Miter Saw Stand**
PM-4000

Contractor-grade portable miter saw stand made for the toughest job site

MEASURING AND MARKING

**MiteriX Angle Duplicator**
530401

Perfect miters every time. Match any inside or outside angle in three simple steps.

**MiteriX Compact**
530402

Get perfect miters every time in three simple steps. Compact size to fit in your toolbelt

**QuickCut™ Circular Saw Cutting Guide**
530416

Versatile, easy-to-use handheld cutting guide for measuring and marking.

From the job site to the garage, there's a workstand for any location or application.

Wood Rack

Ideal for workshops, sheds, garages, or any area where long items need to be stored neatly. 110 lbs (50kg) weight capacity per level. (660/440 lbs total.)

SKU	Description
PBR-001	6 Tier Wood Rack – Orange/Gray
PBR-006B	6 Tier Wood Rack – Gray/Black
PBR-0620	6 Tier Wood Rack – Gray/White
PBR-004	4 Tier Wood Rack – Orange/Gray
PBR-004B	4 Tier Wood Rack – Gray/Black
PBR-0420	4 Tier Wood Rack – Gray/White

Conveyor Roller
PM-2700

Versatile equipment that functions as a portable outfeed table or dolly.

Pedestal Roller
PM-5090

Provides stable outfeed support and freedom of movement when using a table saw. 150 lbs. (68kg) weight capacity.

Tri-Function Pedestal Roller
PM-5093

Offers 3 kinds of support as a portable outfeed table. 150 lbs. (68kg) weight capacity.

The largest and most powerful router motor on the market.

3.25HP Variable Speed Router Motor
PM-6200

The 3.25hp Router Motor delivers the performance you need to get the job done. Whether you're shaping edges, cutting dadoes or rabbets, or using it in the CNC machine, you'll still get the easy handling you need to create your best work.

1/8" Offset Collet Wrench 2-Pack
4028

Router Base
PM-6210

3.25HP Variable Speed Router Motor + Base
PM-6250

Next-Gen Panel Carrier
PM-1850

Large sheets and panels of wood are hard to grab and even harder to move across your workshop. Save time and effort (and your arms and back) with the PM-1850 Panel Carrier, perfectly designed to do the heavy lifting for you.

NEW!

Functions as a panel dolly and table saw feed stand

Helps you easily move large sheets and panels — even full 4x8 sheets

Bottom lip can support 2-3 sheets of plywood at once

7" Smooth-gliding wheels ensure easy transport

Parallel Clamp

Rigidly clamp down case goods and other woodworking projects with rock-solid stability.

SKU	Description
571118	18" Parallel Clamp
571124	24" Parallel Clamp
571131	31" Parallel Clamp
571140	40" Parallel Clamp
571150	50" Parallel Clamp

Sets

SKU	Description
571124T	BORA 24" Parallel Clamp, 2-Pack
571131T	BORA 31" Parallel Clamp, 2-Pack
571140T	BORA 40" Parallel Clamp, 2-Pack
571150T	BORA 50" Parallel Clamp, 2-Pack
571550I	BORA 4pc Parallel Clamp Set - Includes 2 x 24" + 2 x 31" Clamps

Mini Spring Clamps - 20-pc Set
540520

Fit where standard size clamps can't to ensure clamping power in small, tight spaces.

Corner Clamp
551025

Easiest way to ensure material is held together at a perfect 90-degree angle.

Drill Press Vise
551027

Securely grips material without marring it to prevent any slippage or movement.

Open up the workshop for better productivity, improved organization, and increased mobility.

NEW!

High-Clearance Super-Duty All-Swivel Mobile Base
PM-3800
Easily move heavy machines over cracks, cords, and uneven terrain. Supports up to 1500 lbs.

Adjustable in 1" increments

All steel construction

Adjusts from 20.75x23.75" to 28x33.5" (52.7x60.3 cm up to 71.1x85.1 cm)

Non-marring ball bearing wheels

NEW!

Customizable Mobile Base
PM-1100
Mobilize machines with non-traditional dimensions. Supports up to 400 lbs.

Mobile Base T-Extension
PM-3245
Expand existing PM-3500 or PM-3550 mobile base to accommodate 30-53" fence systems.

Mobile Base Extension Rail Kit
BK1218
Expand PM-1000 and PM-2500 to accommodate larger machines

Mobile Base Extension Rails
PM-3036
Expand PM-3500, 3550, 3800 with heavy-duty extension rails.

Universal Mobile Base
PM-1000
Make the most of small shop space. Supports machines up to 400 lbs.

Universal Mobile Base
PM-1050
Make your machines mobile. Supports machines up to 400 lbs.

Heavy-Duty Adjustable Mobile Base
PM-2500
The most popular BORA mobile base. Supports machines up to 650 lbs.

All Swivel Mobile Base
PM-2550
The universal shop workhorse. Supports machines up to 650 lbs.

Super-Duty Mobile Base
PM-3500
Move even the heaviest equipment at the touch of a finger. Supports up to 1500 lbs.

Super-Duty All-Swivel Mobile Base
PM-3550
Four omni-directional wheels make it easy to move any equipment. Supports up to 1500 lbs.

Workbench Caster Kit
PM-950
Heavy-duty brackets and rock-solid foot levers help mobilize your workbench.
